Coal

Coal is a fossil fuel , is the largest source of energy for the generation of electricity worldwide, as well as one of the largest worldwide anthropogenic sources of carbon dioxide emissions . Gross carbon dioxide emissions from coal usage are slightly more than those from petroleum and about double the amount from natural gas .

Coal is extracted from the ground by mining, either underground by shaft mining through the seams or in open pits.

Network

Our network is across Maharashtra and few other states in South as well.
